

## **Dag Hammarskjöld – Peace builder, Communicator and Universalist**

**Regina Tschud**

---

### **Abstract**

*Studying the topic of peace the author came across some information about Dag Hammarskjöld in April 2014. Due to some paraperceptions she started to research about this consciousness, who was the 2nd Secretary-General of the United Nations Organization in the years 1953 to 1961 and one of three persons ever awarded posthumous with the Nobel Peace Prize. This consciousness dedicated a life to peacebuilding and bringing down colonialism and who's principles are still guidelines for the UN until today seems to have a direct connection to Conscientiology nowadays.*

*The author describes some paraperceptions and synchronicities that lead to the conviction that it is more urgent than ever to focus on the qualification in the field of peacebuilding and -research and the creation of a greater sense of unity – within the consciousness itself and among consciousnesses (intraphysical as well as extraphysical) to accelerate the process of reurbanization.*

**Keywords:** Nobel Peace Prize; peace; reurbanization; United Nations.

**Regina Tschud**, education in Business Administration; volunteer of Conscientiology since 2007.
